

Birds

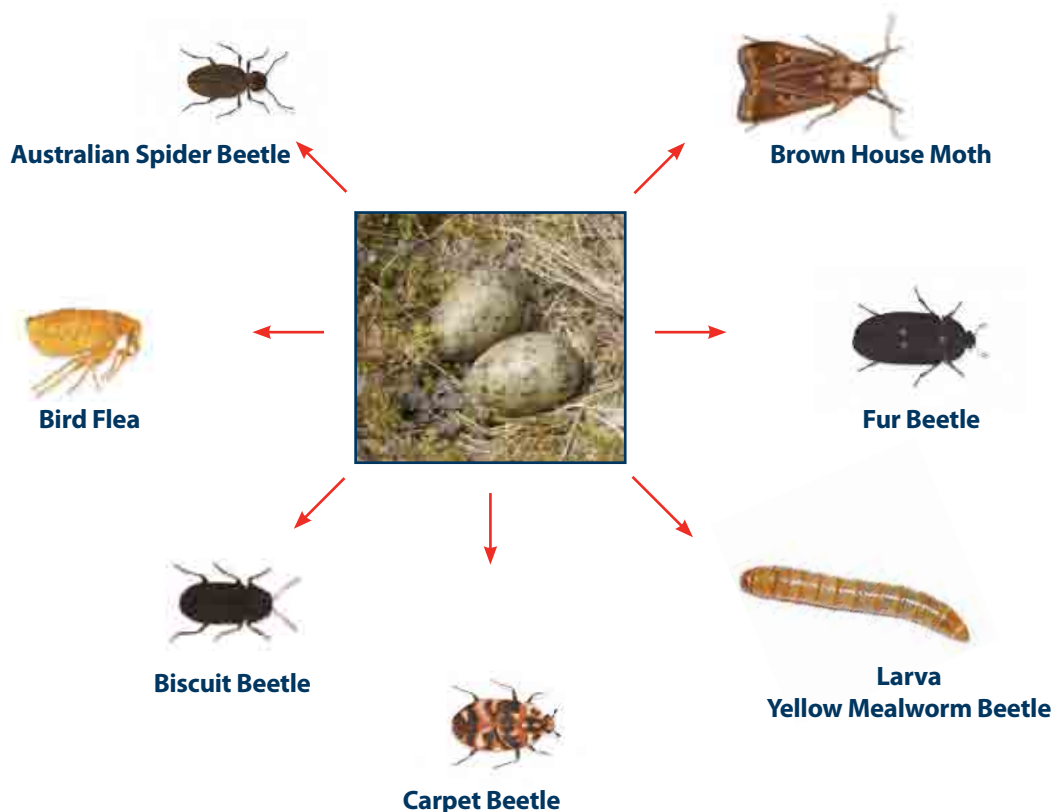

Main species of birds that cause public health risks in the UK

- Feral Pigeon (*Columba livia*)
- Collared Dove (*Streptopelia decaocto*)
- Gulls (Family: *Laridae*)
- House Sparrow (*Passer domesticus*)
- Starling (*Sturnus vulgaris*)

Nests

Old and new nests can become a natural breeding ground for a wide variety of pests and biting insects.

The risks from Birds

- Droppings are unsightly and can lead to hazardous, slippery public walkways and drive customers away
- Damage to property, including blocked gutters and downpipes
- Risk of contamination leading to loss of production
- Risk of diseases: Salmonella; Psittacosis; Newcastle Disease; Bird Fanciers Lung
